PRESS RELEASE

August 5, 2009

Peripheral Manufacturing, Inc, a Denver based manufacturing and marketing firm is pleased to announce a new GSA Contract for AERO-K® Aerosol Fire Suppression Technology. Peripheral's is the first firm to be awarded a GSA contract for Aerosol Technology. AERO-K® is an innovative, 21st Century Aerosol Fire Suppression System that meets NFPA Standard 2010 and is Underwriters Laboratories tested and certified.

AERO-K® is approved for class A (surface fires), B and C fires.

AERO-K® is a new type of fire fighting system that can knock down a fire in a matter of seconds.

AERO-K® is an Aerosol Agent that is environmentally friendly (100% Green), clean, compact, safe, and a cost effective way to protect and prevent serious fire damage for a wide variety of applications which include Computer Rooms, Data Centers, Server Rooms, Wireless Lockouts, Paint Spray Booths, Hazard Cabinets, Train Engine Compartments, Mines, Marine Engine Rooms, Mobile Generator Trailers, Turbines and many more.

Depending on the application, AERO-K® Generators can be activated in a variety of ways. Electronically Smoke Activated Systems are commonly used in Non-Manned Wireless Lockouts, Computer, Data and Server Rooms. Heat Activated Generators are commonly used in Hazard Cabinets, Train Engines Compartments, Marine Engine Rooms, Mobile Generator Trailers and Turbine Areas. Manually Activated Generators can be used in most any Manned Application. Aerosol Technology is used in a wide variety of Military applications including all new Humvees. NASA uses the Thermal units in the Space Crawler.
